## To whom it may concern

## Subject: Letter of recommendation

Dear Madam/Sir,

Siemens Building Technology division offers technical infrastructure portfolio for building automation, energy efficiency, fire safety, security, total building solutions and market specific solutions in buildings and public places.

In our projects we are often invited to design and deliver entire package of low voltage systems containing also the range of network infrastructure, communications and IT security systems.

In such projects we use Siemens' branded products and solutions that come from Siemens Enterprise Communications.

In the market under our responsibility, in Serbia and Montenegro we do cooperate closely with the company NES Communications doo Belgrade, former Communications Enterprise group of our local company Siemens doo Beograd and former Siemens Enterprise Communications doo Beograd.

NES Communications continues the recent business, holds all references, takes over and accepts all rights and liabilities for all existing contracts of former Siemens Enterprise communications doo Beograd.

In last several years we have made few million scale projects together with our colleagues from NES Communications as hotel Splendid in Montenegro, ProCredit Bank in Belgrade, Ministry of Interior Affairs Serbia etc.

The processes they apply and the quality of their services is compliant with the standard that we strive to hold in Siemens. Therefore we chose them as our preferable partner or subcontractor / sub supplier for the projects where their portfolio is required.

On the other side, we do authorize them to develop the projects that require the products from our portfolio. For such projects we will support them with the best prices and commercial conditions and give them our full technical and any other support.

Might you have any questions please do not hesitate to contact us.

Best regards,

Siemens d.o.o. Beograd  
Industry Sector  
Building Technologies Division  
I BT Head  
Pavle Banić, Regional Director
