Lock or unlock the Phone

You can prevent, for example, unauthorized dialing of external numbers and accessing your mailbox during your absence. You get the corresponding code from the administrator.

1. Press ☰.
2. Select "PIN / COS?" and press OK.
3. Select "Change COS?" and press OK.
4. Enter code for unlock and press OK.
5. Press ☰ to return to phone mode.

Using your OpenStage

Save appointments

You can configure your phone to call you to remind you about appointments. You must save the required call times. You can do this for the next 24 hours.

1. Press ☰.
2. Select "Reminder?" and press OK.
3. Select "New Reminder?" and press OK.
4. Enter a 3-digit or 4-digit time, such as 845 (= 8.45 a.m.) or 1500 (= 3.00 p.m.) and press OK.
5. Select "Save?" and press OK.
6. Press ☰ to return to phone mode.

Use timed reminders

You have saved a reminder which exceeds.

1. Lift handset. The appointment is shown.
2. Hang up.

Activate or deactivate "Do not disturb"

If you do not wish to take calls, you may activate "Do not disturb". Internal callers hear the ring tone and the message "Do not disturb". External callers are redirected to the attendant console. The administrator is able to set forwarding destinations for "Do not disturb" so that internal and external calls can be forwarded. When you lift the handset, you will hear a tone reminding you that "Do not disturb" is activated. The attendant can bypass "Do not disturb" and reach you.

1. Press ☰.
2. Select "Feature settings?" and press OK.
3. Select "Do not disturb?" and press OK.
4. Select "Activate?" or "Deactivate?", and press OK.
5. Press ☰ to return to phone mode.

Adjust the Phone

1. Press .
2. Select "Ringer volume?", "Ringer tone?", "Display contrast?", "Open listening?", or "Alert tone?" and press .
3. Press or for adjusting.

Further helpful features of your OpenStage Phone

Your OpenStage provides much more helpful features. See below a small selection with short descriptions. Detailed information you will find in the respective operating instructions.

Labeling Keys

You can label the keys of the OpenStage 15 with the programmed phone numbers or functions either manually or by means of the "Online-Labeling Tool". Please, find the labeling tool under: <http://wiki.unify.com/wiki/KLT>.

Select the appropriate key labeling tool in your language. You can use the tool online via the browser or download it for local use.

Multi-Line

The programmable keys on multi-line phones function as trunk keys. Each key programmed with the "Line" function corresponds to a line. This means up to 6 line keys can be configured on the OpenStage 15.

Lines can be used as a Private, Shared, or Direct call line.

Retrieve Voicemail Messages

Depending on your communication platform and its configuration, you can use this application to access received callbacks and messages from OpenScape Xpressions.

If your system is appropriately configured, you can call the voice mailbox directly and immediately play back the stored messages.

One-Number-Service (ONS)

If your phone is part of an ONS group, you can be reached on all other phones in this group as well as on your own phone. To set up an ONS group, contact your service personnel.

An ONS group may consist of up to three phones, whereby one group member can be an external phone (such as a mobile phone).
