

# Powerful Wireless Solution For Demanding Guests And Corporate Events

## INTRO

The Crowne Plaza Belgrade is ideally located in the central business district of New Belgrade. Only 13 km from the International Belgrade Airport Nikola Tesla, near two shopping malls (Delta City and Usce) and only 5 minutes drive away from the city center, it has always been a hot spot for business travelers and convention guests as much as it was a first choice for various companies hosting and organizing popular business events and conventions visited by a very large number of visitors.

With its 416 guest rooms, 1.300 square meters of flexible meeting space, guests who live the BYOD trend, Crown Plaza had a very important and difficult task ahead – implementation of a reliable, stable and powerful enough WiFi network to respond with high demands of its guests and event organizers – at the same time!

## CASE STUDY
